NGUYEN MINH THUAN

Intern FullStack Developer (.Net core & ReactJS)

📍 Thu Duc, Ho Chi Minh City ✉️ nguyenminhthuandev@gmail.com 📞 0327-986-785

OBJECTIVE

Enthusiastic student with a passion for **fullstack software development**, seeking an internship to apply academic knowledge in a practical environment, enhance technical skills, and contribute positively to the company. Eager to learn and committed to building a solid foundation for a successful career in **software development**.

PROJECTS

Grade Management System

C# developer

- **Description**: A system that allows administrators to manage students, classes, and grades. Provides data import from Excel, export to PDF, and detailed grade management by subject and student.
- **Features**:
  - Administrators can add, edit, delete subjects, students, and grades.
  - Supports data import from Excel and export to PDF.
  - Search and filter data by student or subject.
- **Responsibilities**: Developed backend modules with ASP.NET Core API, managed databases with MySQL, tested, and deployed using Docker for a stable development environment.
- **Technologies Used**: ASP.NET Core API, ReactJS, MySQL, Docker, Postman
- **GitHub**: DoAn-QuanLyDiem

Dormitory Management System

C# developer

- **Description**: A dormitory management system to support managing multiple rooms, tenants, and utilities like electricity and water.
- **Features**:
  - Manages room, tenant, contract, and utility information.
  - Functions for adding, deleting, modifying information, and uploading files.
  - User-friendly interface and management through dashboard.
- **Responsibilities**: Built APIs with ASP.NET Core, integrated frontend with ReactJS, and managed data with SQL Server.
- **Technologies Used**: ASP.NET Core API, ReactJS, SQL Server, Bootstrap
- **GitHub**: QuanLyTro

EDUCATION

2021 - Present | Software Development

iSpace College of Cybersecurity

SKILLS

Backend Development:

- **C# (ASP.NET Core)**: Proficient in developing RESTful APIs and web applications with ASP.NET Core, experienced in routing, data querying, and performance optimization.
- **NodeJS (ExpressJS)**: Basic knowledge in building backend applications and RESTful APIs with ExpressJS for lightweight, high-performance web applications

Frontend Development:

- **ReactJS**: Experienced in building interactive and responsive user interfaces, managing state with React, and integrating with backend services.
- **HTML, CSS, JavaScript, Redux**: Basic skills in creating and styling interfaces, adding interactive effects; Skills in managing state with Redux and supporting asynchronous API calls

PROJECTS

Facility Management System

C# developer

- **Description**: A system to assist iSpace College in managing assets, departments, and suppliers. Employees can borrow assets, and managers can control requests and assign privileges.
- **Features**:
    - Manages information on assets, departments, and suppliers.
    - Functions for submitting and processing asset borrowing requests.
    - User roles include employee, manager, and director.
- **Responsibilities**: Developed and implemented facility management functions, designed the database, and deployed APIs.
- **Technologies Used**: ASP.NET Core MVC, SQL Server
- **GitHub**: HeThongQuanLyCoSoVatChat

WORK EXPERIENCE

IT Intern

Tien Khanh Solutions Co., Ltd

Duration: May 2024 – Present

Responsibilities:

- Researched Blazor model and applied it to develop warehouse management applications.
- Developed a warehouse management application using Blazor, including functions for adding, editing, deleting, and querying warehouse data.

SKILLS

Database Management:

- **SQL Server**: Skilled in designing relational databases and writing queries.
- **MongoDB**: Experience with NoSQL databases for flexible data storage and processing.

Tools & Technologies:

- **Docker**: Basic knowledge of containerization, using Docker to create consistent development environments and simplify deployment.
- **GitHub:** Proficient in version control and team collaboration with GitHub.
- **Postman**: Skilled in API testing to ensure backend services stability.

SOFT SKILLS

- **Debugging & Troubleshooting:** Skilled in identifying and resolving code issues through debugging tools and logical thinking.
- **Problem-Solving & Solution Design:** Strong analytical skills and creativity in designing effective solutions for complex technical challenges.
- **Team Collaboration & Communication:** Experience working in a team-oriented environment, effectively collaborating with colleagues to achieve project goals.
